My dear Brother,

It affords me pleasure to introduce to you, our friend Professor C. B. Adams, of Middlebury College Vt. who has been spending the winter months in scientific ramblings through this Island.

You will be happy to see one who has been so recently amongst us, and has had opportunities of observing the people in their unassumed Character.

With very kind regards to my friends in Boston, and Framington, and to your family,

I remain

My dear Brother,

Yours Affectionately
